

BRIDGES CITY: The Team-Based Strategy Game of Bridge Building and Tower Conquering!

By Coccolithopher

Gameplay:

BRIDGES is played with 6 teams of 3 over 18 real-life days! Each day your team will work together to use your Moves. Your team gets 10 Moves a day. Each Move used gives one of the following options: Build a Bridge, Claim a Floor, Claim a Tower, Paint a Bridge, Paint a Floor, and Scrape a Floor. If your team has leftover moves when the day resets you can go above 10 moves, to a max of 20.

Building Bridges:

Bridges allow your Team to travel between Towers and gain Access to Floors.

To build a Bridge, you can use a Move to place your Team's glass, in one of the [valid formations](#), from an open Node of a Floor you can Access, to an open Node of another Floor on the same level.

Your team has Access to a Floor if you can reach it from your Base Tower by traveling on Bridges you own and ladders.

Each Floor has 8 Nodes, some of which might be blocked off by a block and be inaccessible.

- Bridges MUST be built between open nodes.
 - Bridges built from a Side Node MUST connect to a Side Node.
 - Bridges built from a Corner Node MUST connect to a Corner Node.
 - Bridges MUST be built in one of the [valid formations](#).
 - Bridges on the same level must NOT intersect or overlap in any way.
 - Bridges must NOT connect to the same node as another bridge.
 - Bridges must NOT change elevation.
-

Claiming Floors:

Claiming Floors gains your team points, which are required to win the game.

If you have Access to an Unclaimed Floor, you may Claim the Floor by using one of your Moves to place your Team's glass on the slabs surrounding the trapdoor at the center of the Floor.

Claiming Floors

Claiming Floors gains your team points, which are required to win the game.

BRIDGES CITY: The Team-Based Strategy Game of Bridge Building and Tower Conquering!

By Coccolithopher

If you have Access to an Unclaimed Floor, you may Claim the Floor by using one of your Moves to place your Team's glass on the slabs surrounding the trapdoor at the center of the Floor.

Claiming Towers

Claiming Towers allows you to lock the points gained by its Claimed Floors, and gives your Team bonus points.

If your Team has Access to all Floors of an Unclaimed Tower, and all of them are Claimed or Painted by you, you may Claim the Tower by using a Move to place one of your Team's glass on the top (under the end rod).

- Claimed Towers MUST be decorated with 4 banners & 4 carpets within 1 hour of claiming.
 - Teams must NOT Claim a Tower if some of its Floors are not Claimed or Painted by them.
 - Teams must NOT claim a Tower if some of its Floors are not Accessible to them.
-

Painting Bridges:

Painting Bridges allows you to travel on Bridges built by opponent Teams to gain Access to Floors behind them, or to block opponent Teams from Painting your own Bridges.

If you have Access to a Bridge that is not Painted, you can use one of your Moves to Paint it by placing your Team's carpets on top of the glass.

Your Team can travel on a Bridge if either its glass is your color, or if its carpets are your color.

Painting & Scraping Floors

Painting Floors allow you to steal an opponent Team's Claimed Floor to steal their point and disrupt their Tower Claim, or to block opponent Teams from Painting your Claimed Floor.

If you have access to a Claimed Floor of an Unclaimed Tower, you can Paint over it by placing carpets on top of the glass.

If your Team's Claimed Floor is Painted in an Unclaimed Tower, you can use one of your Moves to Scrape the Floor by removing the carpets.

- Teams Scraping a Floor MUST inform the mods
for move count tracking
- Teams must NOT Scrape a Floor if the glass is not their color
- Teams must NOT Scrape a Floor if the Tower Claimed

BRIDGES CITY: The Team-Based Strategy Game of Bridge Building and Tower Conquering!

By Coccolithopher

Scoring:

Points are earned for your Team when you Claim Floors and Towers.

- +1 point per Claimed Floor which is not Painted.
- +1 point per Painted Floor.
- +1 bonus point per Claimed Tower in Team's own Color Area.
- +2 bonus points per Claimed Tower in Gray or Enemy Color Areas.
- +3 bonus points per Claimed Tower in the White Color Area.

The Team with the most points at the end of the 18 days wins BRIDGES!

The Teams with the top scores splits the pot:

- 1st place: 12db per player
 - 2nd place: 8db per player
 - 3rd place: 4db per player
-

BRIDGES Logistical Rules

Non-obvious specifics needed to actually play the game of Bridges

Sign Ups and Starting the Game!

- Once sign ups open, you can enter your username in the sign up spreadsheet to sign up!
- 8 spots open every 8 hours in case they fill extremely quickly to give different timezones a good chance
- There are 9 Backup slots for when the sign ups fill
- Backups will be called on if a player drops out of bridges
- Backups that are not called on will get a slight priority when signing up for the next round
- Once sign ups are full, teams will be randomized and assigned. Team colors will stay hidden until 24hrs before the game starts.
- Once colors are revealed, teams are to pick up their team blocks and cheat sheets from their base.
- The entry fee for bridges is 4db, all of which will go into the prize pool. You do not need to turn in your diamonds until the end of the game.
- Turn in your db in the white Shulker on top of the tower at the center of bridges, named to your username

Your Home Base

- Every team has a home base area surrounding their starting area, used to store your team blocks

BRIDGES CITY: The Team-Based Strategy Game of Bridge Building and Tower Conquering!

By Coccolithopher

- During the round, your team may add any additions to the "base" within the area, but respect the builds from previous and future rounds. (Basically, add on but leave space)
- Do not build outside your given team area
- Each team will be given 9 stacks of colored glass blocks, which the team will use to build bridges
- They will also be given 6 stacks of carpet, which is used when painting bridges/floors
- If your team runs out of either of these, we can get you more

During the Round

- While yes, Bridges is a competitive game, it is important to remember to be respectful to the other teams. Toxicity will not be tolerated.
- There is a group of Bridges Moderators to help enforce the rules of Bridges and help the game run smoothly. You can check out the Current moderator list in the sign up sheet.
- Moderators cannot play in the round they are moderating.
- Teams are responsible for tracking their own point totals, towers claimed, and move pool on the cheat sheet. If you notice another team not following this, please contact the mods.
- If your team has built a bridge incorrectly, the mods will remove it.
- Reset time (the time when more moves are added to every team) is at 4pm CST

Team Spirit!

- At the end of the game, one team will be selected to get the Team Spirit Trophy! Before the final day, each team can make a submission of photos or videos that show team Spirit.
- Then there will be a popular vote, combining the submissions with general team Spirit during the game.
- Example submissions people have submitted include Team Skin Selfies, Movie Posters, and Note Block Songs

Ending the Game!

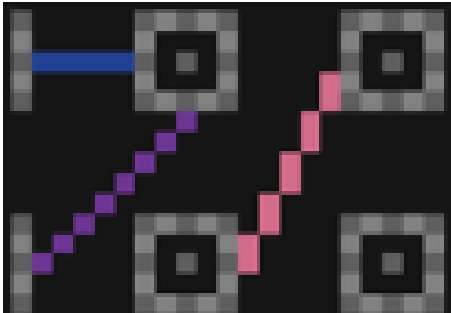

- At the end of the 18 days, the final scores will be counted up!
 - The following Saturday at reset time will be the Awards Ceremony!
 - During the awards ceremony, the team Spirit award will be announced, and then the final winners!
 - The 3 top scoring teams will split the 72db from entry fees! (3rd place gets their investment back, 2nd place doubles it, 1st place triples it!!)
 - The winning team will also get a custom trophy based on their team name, where they can leave a special comment in a book.
 - Sign ups for the next round will open immediately after!
 - After the ceremony, teams are responsible for removing all of their bridges from the game, and the towers will be re-randomized by the Moderators for the next round.
-

Appendices

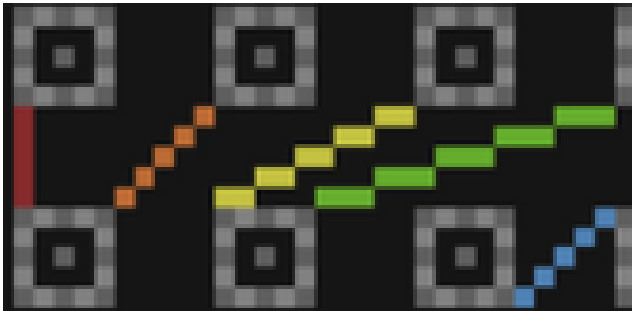

Appendix 1: Valid Bridge Formations

Bridges must be built in one of the following valid formations (including rotations and mirrors of them)

Side Bridges

Corner Bridges

Appendix 2: Construction and Materials List

Towers are built from 3 parts, a Base (which includes the street), 1-5 centers, and a top

Each area of the city has towers built out of different materials, with a different block for each of the following: Sidewalk Block, Base Block, Trapdoors, Filler Block, Filler Slab, and Node Block.

Additionally, all towers contain some levels of: Bamboo Signs, Gray Carpet, Gray Concrete, Ladders, and End Rods. There are 297 towers in total.

Tower nodes have a 50% chance to be open/closed. In the case that a tower randomizes with 0 open nodes, a ladder will be added. Each tower floor in a non-white tower has a 10% chance to have a ladder. Floors in a white tower have a 15% chance to have a ladder. If two ladders are on subsequent floors move them apart or remove one.
